

# Transport Access Program

## Banksia Station Upgrade

**Project Update**

**August 2020**

### Site investigation work

Transport for NSW is upgrading Banksia Station to make it easier for everyone to access, including people with a disability or limited mobility, parents/carers with prams, and customers with luggage. Community consultation on the plans will occur in the coming weeks.

Preparation activities and preliminary investigation work to help inform the plans will take place from **6am to 6pm** on **Saturday 15** and **Sunday 16 August 2020**. For the safety of our staff and customers, this work will be completed during a scheduled Sydney Trains track work weekend, when trains are not running.

Please visit **[www.transportnsw.info](http://www.transportnsw.info)** or call **131 500** for information about replacement buses during this time.

Activities during this weekend include:

- services investigation and surveying work
- soil sampling
- installing three power poles on the station side of Railway Street.

Equipment to be used will include a concrete saw, hand held tools, trucks, elevated work platform, crane, vibration roller and a piling rig.

Traffic control will be in place to assist pedestrians and motorists around the work areas. Pedestrian access through the station underpass will be maintained.

To complete the work safely, there may be some temporary loss of timed parking spaces on Railway Street during this time.

One timed parking space on the station side of Railway Street will be permanently removed due to the location of the new power pole.

### Tree trimming work on Railway Street

To allow the poles to be installed safely, tree trimming will take place on **Monday 10 August between 7am and 6pm**. Equipment to be used includes an elevated work platform and chainsaws.

Pedestrian access around the station and through the underpass will be maintained and traffic control will be in place during the tree trimming work.

For more information call **1800 684 490**,

Email **[projects@transport.nsw.gov.au](mailto:projects@transport.nsw.gov.au)** or visit **[transport.nsw.gov.au/banksia](http://transport.nsw.gov.au/banksia)**

Please see the map below for the location of work areas.

Wherever possible, measures to reduce noise will be used including turning equipment off when not in use, positioning equipment as far away from residences as possible, using non-tonal reversing beepers and stopping work for respite periods.
