

We're kicking off work on Bellambi Station upgrade

Work starts 13 June 2022

The NSW Government is improving accessibility at Bellambi Station. This upgrade is being delivered as part of a NSW Government initiative to provide a better experience for public transport customers by delivering accessible, modern, secure and integrated transport infrastructure across the state.

What we're doing

Thank you to the stakeholders and members of the community who shared their experiences of accessibility at Bellambi Station in October last year.

We considered all feedback as we developed detailed designs

for the upgrade. You can read the community engagement summary at transport.nsw.gov.au/Bellambi.

We received planning approval for our upgrade designs in May 2022. With this approval, local construction contractor, Degnan, can begin site establishment and work.

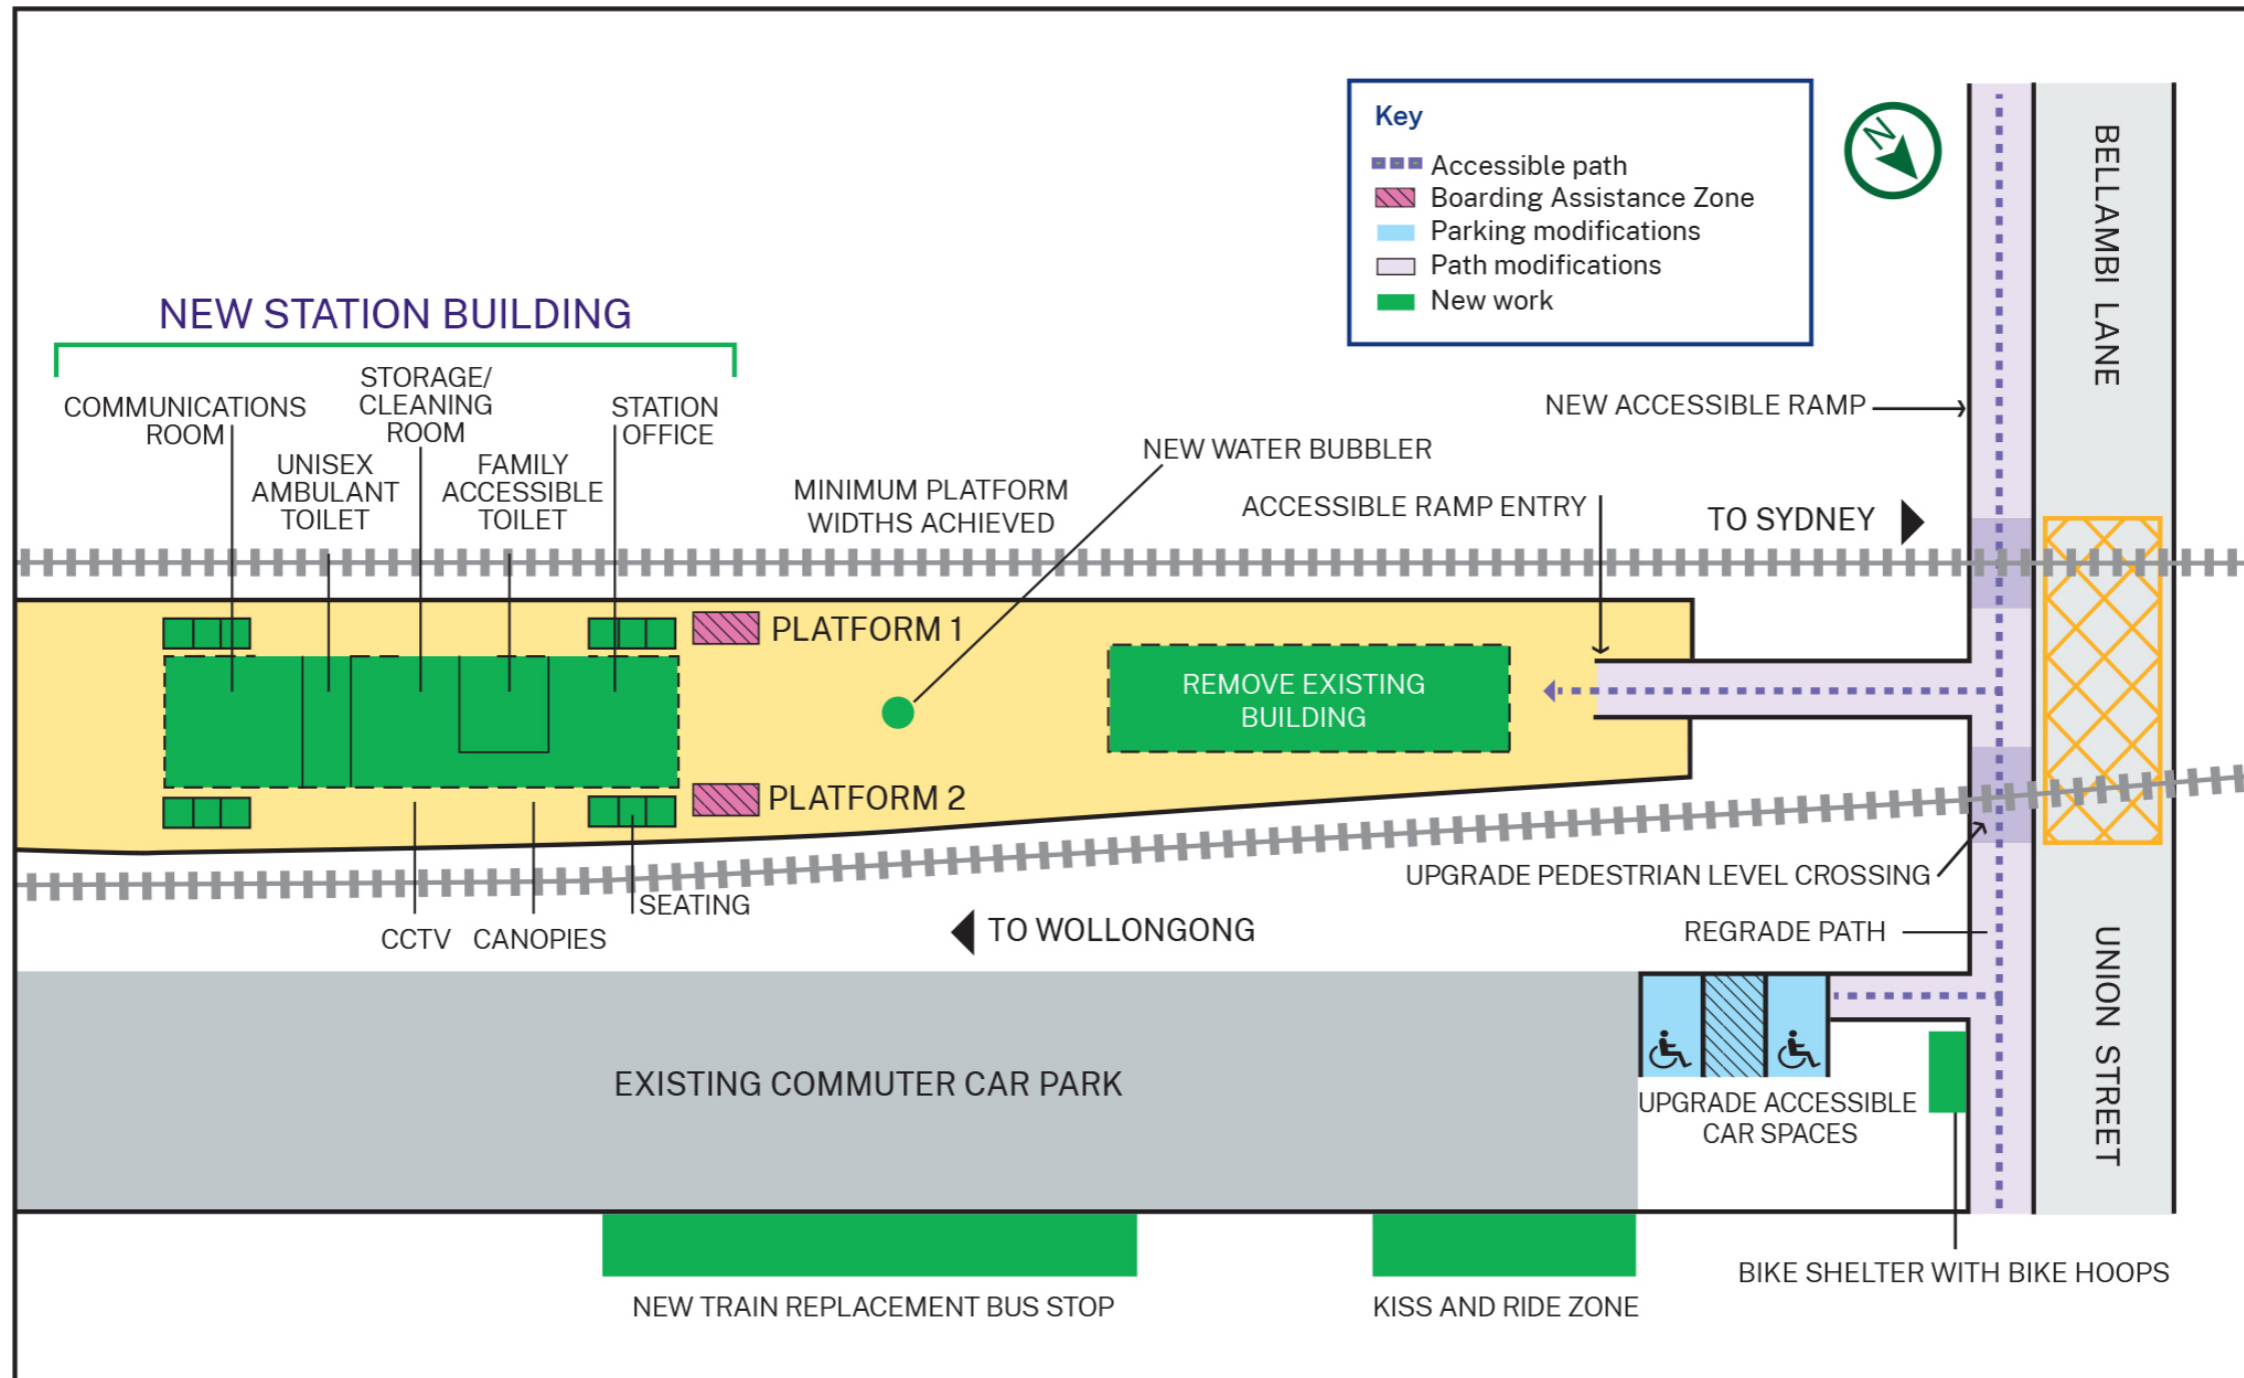

Construction activities will begin on **13 June 2022** and will be completed within 12 months. Initial work will include site establishment and demolition work.

This will be followed by reconfiguration work and construction of new and upgraded amenities.

Key features of the upgrade

As part of the accessibility upgrade, we will be:

- updating the existing level crossing pedestrian zone
- constructing a new station entry ramp
- creating two new accessible parking spaces
- creating a formal kiss and ride zone
- installing a new bike shelter and hoops
- constructing a new station building further along the platform which will include accessible amenities
- demolishing the old platform building to achieve compliant platform widths and access paths
- upgrading existing lighting to increase security
- regrading footpaths
- constructing a new switchback ramp on Bellambi Lane
- relocating the train replacement bus stop from Brompton Road to Francis Street.

Work starts
13 June

The upgrade is expected to take about
12 months weather permitting

Upcoming work

Site establishment

We will start setting up the site compound on **Monday 13 June**. This will include the delivery and installation of site sheds, temporary services and fencing. There will be traffic control in place to assist with pedestrian and vehicle movements. The site compound is expected to remain in place for about 12 months, weather permitting.

Commuter car park

From **Thursday 16 June**, we will begin work in the carpark to make it accessible and compliant with the standards set out in the Disability Discrimination Act (DDA).

This will involve the temporary relocation of the accessible parking spaces within the commuter carpark. Pedestrian access to and from the carpark will be maintained at all times.

Weekend work

Work is planned for the weekend of **Saturday 2 July** and **Sunday 3 July**. For the safety of staff and customers, this work will take place during a scheduled Sydney Trains trackwork period, when no trains will be running, and the station will be closed. Signage will direct customers to alternative transport.

The work being carried out over this weekend will include:

- preparing foundations for the new station building
- excavating the platform for new services.

Equipment to be used includes delivery and dump trucks, excavators, a bobcat, concrete trucks and pumps, compaction equipment and hand tools.

Some out-of-hours work will be required between **6am Saturday 2 July** and **10pm Sunday 3 July**. This work may generate higher than normal levels of noise.

Respite vouchers (grocery or multipurpose vouchers) will be offered to residents immediately surrounding the out-of-hours working areas.

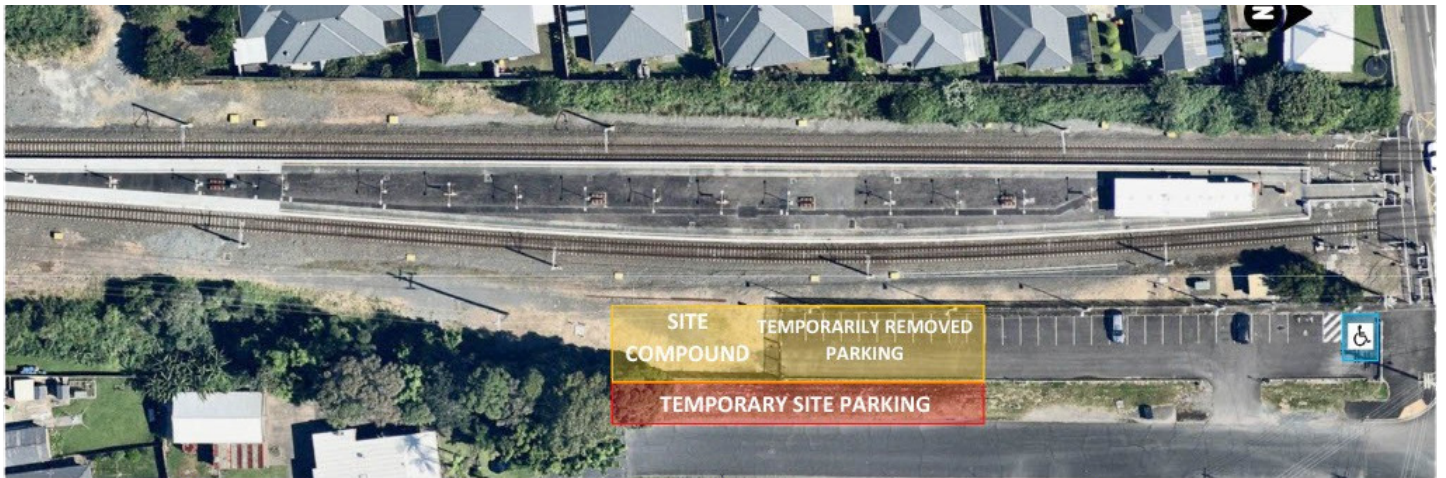

Working hours

Most work will occur during standard construction hours between **7am and 6pm Monday to Friday** and **8am to 1pm on Saturdays**.

There will be workers at the station on the night of **Thursday 16 June 2022** to connect power to the site compound. This work is not expected to generate elevated levels of noise.

Wherever possible, we will take measures to reduce noise including turning off vehicles and equipment when not in use, monitoring noise, exercising respite periods during work, and using non-tonal reversing beepers. We apologise for the inconvenience and thank you for your patience while this work is carried out.

All work is dependent on weather and site conditions and is subject to change.

Commuter car park

From **Monday 13 June**, 11 parking spaces will be unavailable. This space will be occupied by components of the site compound and will allow for vehicle access to the site compound. It is also necessary for the work on the new accessible parking spaces, kiss and ride zone and footpaths.

Pedestrian access to and from the carpark will be maintained at all times.
