

Transport Access Program Bellambi Station Upgrade

Community notification September 2022

The NSW Government is improving accessibility at Bellambi Station. This upgrade is being delivered as part of the Transport Access Program, an initiative to provide a better experience for public transport customers by delivering modern, safe and accessible infrastructure.

Work is progressing on the platform for the new station building.

Completed work

Work continued on the platform in August, including piling and excavation. Preparations for the concrete slab also started.

Upcoming work

In September the car park and lighting upgrades will begin. This work will be done in stages to safely allow pedestrian access to the station. There will be excavation work at the level crossing end of the car park to install electrical services for the new lighting.

Working hours

Work will occur between **7am and 6pm Monday to Friday** and **Saturdays from 8am to 1pm**.

Workers will be on site manually moving steel beams from the site compound onto the platform from **Monday 12 September** until **Wednesday 14 September***, **between 8pm and 4am**. This work will not be noisy.

All work is dependent on weather and site conditions and is subject to change.

**Wednesday 14 September will only be used if the work is not completed by 4am Tuesday 13 September.*

Commuter car park

To allow for the safe delivery of equipment and materials, and to accommodate the upcoming work at the northern end of the car park, designated accessible parking will be relocated and some parking spaces will be unavailable. The commuter car park will remain open with accessible parking spaces available for the duration of the project.

Contact

If you have any questions or would like more information, please contact our project team:
